

# Gong mini

L'emozione di una piccola luce preziosa  
The emotion of a small precious light

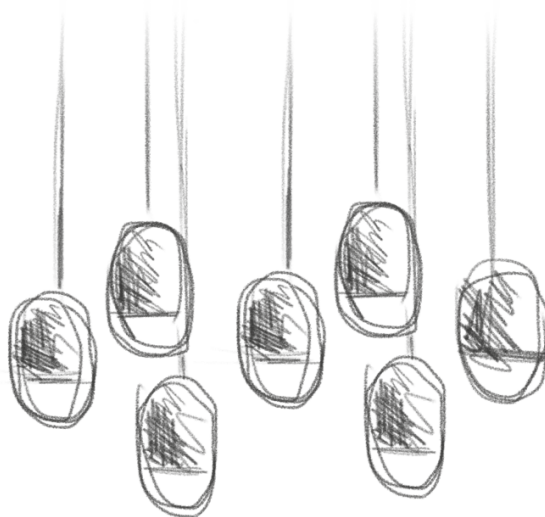

# Gong mini

Il secondo capitolo della storia di Gong racconta di una scia di piccole lanterne che accolgono e moltiplicano la luce. Con la versione Mini, Gong amplia ulteriormente la propria collezione e offre nuove possibilità per risolvere molteplici situazioni spaziali e luminose, creando movimenti fluidi ed eleganti. Per rendere Gong Mini ancor più versatile, è stato studiato un sistema di soluzioni di attacco a soffitto che permette di realizzare diverse composizioni, personalizzabili nella scelta della struttura e nel numero di punti luce. Oltre alla classica sospensione singola, è possibile ricreare installazioni multiple a raggiera, lineari o a cascata, progettando anche soluzioni custom, ideali per soffitti alti o che si sviluppano su diverse altezze. La lampada Gong mini mantiene la propria identità di prodotto definita e riconoscibile in ogni variazione compositiva. Il suo diffusore è un bozzolo di vetro soffiato, inciso esternamente a filo lucido e verniciato all'esterno lasciando però trasparente l'ultima porzione di vetro rivolta verso il basso.

Designer: **Sergio Prandina**

The second chapter of Gong's story is about a trail of small lanterns that hosts and multiplies light. With the Mini version, the Gong collection develops further and offers new possibilities to resolve multiple spatial lighting scenarios, creating fluid and elegant movements. In order to make Gong Mini even more versatile, a ceiling connection system has been designed which lets one create different compositions. It may be customized in terms of the structure and the number of lights. In addition to the classic single suspended lamp, it is possible to create various radial, linear or cascade installations. It was designed for customized solutions and it is ideal for high ceilings or those that have many different levels. The Gong mini lamp keeps well-defined and recognisable its own product identity in every composition. Its diffuser is like a blown glass cocoon, externally engraved and painted, leaving clear the last downward glass portion.

Cristallo soffiato a mano e verniciato

Hand-blown and painted crystal

Gong mini mantiene una sola incisione del vetro soffiato, rifinito e verniciato esternamente. Tutto rigorosamente fatto a mano in Italia. È flessibile nelle forme e nelle composizioni, senza paura di perdere la propria bellezza.

Gong mini keeps a single engraving of the blown glass, finished and painted externally. All strictly handmade in Italy. It is flexible in forms and compositions, without fear of losing its beauty.
