

# Finland

DESIGN BY  
MENGOTTI/PRANDINA  
2003

<sup>IT</sup> La luce spesso ricopre il ruolo di attrice non protagonista, capita di notarla solo quando manca. Finland sposa perfettamente la trama di un racconto di luce che si compone di vetro soffiato, di una luminosità importante e al contempo discreta, di una scelta di design dettata da una ricerca stilistica lontana da mode e tendenze passeggere. Con le sue peculiarità, Finland è una collezione

senza tempo, senza limitazioni di spazi, con molte pagine ancora da scrivere.

<sup>EN</sup> Light often takes on a supporting role, which you only notice when it is missing. Finland perfectly joins together the concept of this light's design, made up of blown glass, with a bright light that is at the same time discreet. It reflects a chosen design dictated by style research done far away from fads and passing trends. With its peculiarities, Finland is a timeless collection, unlimited by space, and with many pages still to write.
