

# Teodora

La lampada Teodora esprime con due semplici elementi la capacità della luce di trovare sempre uno spazio per essere protagonista. In questa collezione la luce viene guidata verso il basso dal diffusore in metallo, perfettamente verniciato, ma si evidenzia altresì in una storia parallela, quella della luce indiretta che illumina l'ambiente verso l'alto e trova la sua giusta espressione attraverso un diffusore di vetro bianco.

The Teodora lamp, with its two simple elements, shows how light always manages to find a way to get the starring role. In this collection, the light is guided downwards by the perfectly painted metal diffuser. It also has a parallel design, where indirect light illuminates the room by pointing upwards, finding the right expression through a white glass diffuser.

Designer: **Sergio Prandina**

Teodora crea suggestivi punti luce illuminando ogni spazio in modo diretto e indiretto. L'unione di metallo e vetro mette in risalto la semplicità di un design senza tempo, che sa emozionare creando splendide ambientazioni.

Teodora creates suggestive light spots illuminating every space in a both direct and widespread way. Metal and glass come together to enhance the simplicity of a timeless design and to create beautiful interiors.
