

Chan

Questo è uno dei racconti più articolati di Prandina. È una storia sbalorditiva da raccontare a tutti, ma che lascia senza parole se la si vive in prima persona. È in quel primo incontro, in quell'esatto momento, quando l'eleganza della leggerezza prende il sopravvento, che inizia la magia, quando la struttura metallica accompagna il suo punto luce, tra un angolo di 90 o 180 gradi e un vetro bianco che diffonde una luminosità generosa, tra la trasparenza dei cavi e la maestosità di una composizione complessa. Una storia da vivere in prima persona.

This is one of Prandina's most articulated tales. It is a stunning story to tell everyone about, but one which leaves you speechless when you experience it yourself. It all happens in the first encounter, in that exact moment, when the elegance of lightness takes over and the magic begins; when its metal structure accompanies its light source, at an angle between 90° and 180°, and a white glass generously diffuses the light among its transparent cables and the grandeur of its complex composition. A product to try out first hand.

Versione LED con tredici punti luce e struttura ottone
LED version with thirteen light spots and brass structure

Chan BR9+AR3+R1

Versione con tredici punti luce con
lampadina G4 e struttura ottone
Version with thirteen light spots with
G4 bulb and brass structure

La maestosità di Chan è fatta di pochi e semplici elementi chiave che messi insieme danno luogo ad una perfetta armonia. Un accostamento di linee e volumi delicati che sorregge una costellazione di piccoli diffusori di vetro dalla forma tondeggiante o tubolare.

The grandeur of Chan is made of few and simple key elements that when put all together give rise to a perfect harmony. A combination of lines and delicate volumes that hangs a constellation of little rounded or tubular glass diffusers.
